Capability and Services

Fathom Pacific Pty Ltd offers charter of this fully equipped 2C survey vessel. Fitted with state-of-the-art electronics and skippered by experienced masters, the vessel is easily deployed throughout Victoria.

Combined with Fathom Pacific's ROV, scientific diving and our wide range of other surveying and sampling tools and experience, the vessel can be used to deliver complete scientific services. Alternatively, Fathom II can be supplied as a mobile, turn-key platform for research or commercial projects.

Projects

Fathom Pacific works in consulting and research throughout Australia and internationally. In Victoria, RV Fathom II is being used on several natural resource management projects in Western Port and Port Phillip Bay. The vessel is perfect for underwater surveying and equipment deployments, diving operations, ports and harbours works, water quality monitoring, and any project requiring an agile, safe and robust offshore platform.
